Product description

Water-borne twig lacquer that is used to reduce the risk of impact from twigs when painting wood indoors.

TECHNICAL DATA:

Binder	Akrylemulsion
Volume Solids	24%
Density	1,02 kg/l
Gloss	Glossy
Material consumption	6-11 m ² /l
Temperature at painting	Min: +8°C
Tools for painting	Brush
Dust dry	0,5 h
Re-paintable	2 h
Completely dry	2 h
Colour	Colorless
VOC category	

Pre-painting:

The surface must be clean, dry and firm.

Painting:

The paint coating is well stirred before use. Paint 2 layers for best results. The first layer is blocking and the other seals. The paint lacquer should then be painted with the appropriate color.

Post-painting:

NOTE! Coat lacquer minimizes the risk of impact greatly, but when twigs can contain several different resins, one can never guarantee that the impact is completely avoided.
