

## Outdoor Primer Aqua

### Product description:

Outdoor Primer Aqua is a water based oil outdoor undercoat, intended for priming wood outdoors. This product is primarily to be used as primer on new wood constructions outdoors, but can be used when repainting worn, earlier painted, surfaces as well. The product is water proof and based on natural special oils, which provides a very good protection. Outdoor Primer Aqua is produced in Sweden.

### TECHNICAL DATA:

Area of application	Outdoors
Binder	Alkyd / oil
Volume Solids	31%
Weight Solids	45%
Density	1,26 kg/l
Gloss	Fully matt
Washability	Class 1 (EN 13300)
Thinner/Cleaning	Water
Material consumption	6–10 m <sup>2</sup> /L
Temperature at painting	Minimum +5°C
Tools for painting	Brush, roller and spray
Dust dry	4 h
Re-paintable	6-8 h
Completely dry	48 h
Colour	White
Flammability	Not flammable
VOC category	(Cat. A/d): 130 g/l (2010)

## Outdoor Primer Aqua

### How to use

#### Pre-painting

Always start by reading the instructions on the label. It is important to be thorough from the beginning. The use of correct tools and a carefully performed base is the foundation for a successful result. Stir well from the bottom before starting to paint.

The air and surface temperature is also important for the end result. Do not paint if it is below +5°C. The surface must be clean, dry and firm. Brush or scrape off loose old paint and/or porous and degraded wood. Wash previously painted surfaces with façade cleaner and disinfect mouldy surfaces. Rinse with water and let dry.

Before coating new wood, we recommend priming with Grundolja Aqua, especially on end grains and timber joints.

#### Painting

Apply twice with roller, brush or – after dilution – with sprayer. It is better to apply several thin coats, with drying time in between, then one thick coat. New, previous not treated wood, we recommend at least two coats.

As top coat use for instance Storm, Solid or Titan when this undercoat is completely dry.

#### Post-painting

Wipe off the tools thoroughly before cleaning with water. Seal the tin carefully after use and keep out of reach for children. Liquid residues may not be poured down the drain, but be submitted to the local collection point. Protect the environment, like we do.
